# What is Cryptonaire Network?

Before I created Cryptonaire Network - Everyone was struggling with earning a stable, growing crypto portfolio and many were on the verge of giving up. I was consulting multiple crypto opportunities and working extremely hard to setup marketing campaigns that users can take advantage of. Shortly after a massive boost in revenue thanks to my effort - those projects would just disappear. Every Crypto project kept shutting down. This led me to questioning everything and eventually turning the entire crypto model upside down,

breaking all the rules and freeing me from the chains of the old ways. After several months of trial-and-error, testing everything and figuring things out the hard way - without anyone guiding me I've finally reached a point where YOU can achieve MASSIVE Wealth in the Crypto Market at the same rate as I have experienced. In just under 18 Months, I have produced close to \$10 Million in Revenue just on promoting crypto opportunities as an affiliate. Now, you have an exact duplicate of the entire Cryptonaire Network system I built for FREE by simply logging in to the dashboard. Earning in crypto is just as important (if not more) than buying coins and selling them at a higher price. With regulations becoming tighter, now is your only chance to turn your life around.

**Free Members** will still be able to earn a commission! I grew up with zero income in a rough neighborhood. English is my third language. I understand the pain of poverty. Most opportunities force you to pay to earn any commission. This is not that place. Use your earnings to double your commission as a paid member then climb. We're in this together.

**Paid members** will earn double commission. There's an Indian friend I met in 2022. He uploaded a Youtube video that got 50 views. It was a horrible video. A Russian gentleman saw it, registered under his link, and did \$20 million in revenue. That Indian kid pocketed \$2 million in USDT as a result! Believe me when i say, 1 referral can do millions for you. Be sure to become a paid member immediately; there's commission to be made!

***“Their vision is in line with exactly what I need as an advertiser.”***

## Part 1 - The Story:

I was approached by Minthub as they have been keeping a close eye on the development of Cryptonaire Network. They reached out to several companies and crypto influencers to market their product.

There were 3 key reasons they received my attention:

### 1st reason:

Their concept is brilliant! I have been running paid advertising since 2011. Regulations on ads have been ridiculous. Their vision is in line with exactly what I need as an advertiser.

### 2nd reason:

The strategy is on point! Rather than spending money on advertisements with unclear returns, they decided to offer a commission for people during their funding stage. This is desirable both for me, and for the Cryptonaire Network community.

### 3rd reason:

The big players they lined up! Minthub have approached, received a thumbs up, and have gotten into conversations with some of my inner circle. Everybody is impressed and primed to bring their audience and to use the Minthub platform when it launches!

## Part 2 - The Partnership Deal:

Negotiations were smooth on their end, tough on mine. I wanted to ensure a significant commission rate exclusively for Cryptonaire Network. The partnership was simple; Bring us an audience and we will reward your members handsomely. I negotiated the lock-in period, direct access to Minthub sales in our dashboard, and more.

## Part 3 - Exclusive To Cryptonaire Network!

Cryptonaire Network is proud to announce that we have the highest, most favorable commission structure, and we are directly featured in the Minthub website! We laid out the marketing plan for the private sale and consulted in regards to finding top advertisers to make this project a huge success
